DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Freeman (5226,787).

Freeman discloses a cylinder block (10) for an internal combustion engine having a lower, crankcase receiving portion and an upper, cylinder head receiving portion, at least one cylinder bore formed therein extending between said lower and upper portions and surrounded at least in part by a coolant jacket (11,12,14), and a pump receiving portion formed at one side of said cylinder block and having a communication passage communicating with a corresponding passage formed in said cylinder block, said communication passage having an upper wall that is inclined (sole figure) upwardly from said pump receiving portion toward the upper portion of said cylinder block to facilitate casting of said cylinder block without the formation of unwanted metal voids.

A cylinder block as set forth in claim 1, wherein the communication passage terminates in at the upper end thereof, see figure.

With regard to claim 3, wherein the pump comprises an engine coolant pump and the communication passage communicates with the cooling jacket, see figure.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Freeman (5,226,787) in view of Onofrio et al (5,083,537).

Freeman discloses all the limitations as applied to claims 1-3 except for reinforcing ribs.

Onofrio et al disclose reinforcement ribs, see figure 6.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of Freeman by using reinforcement ribs as disclosed by Onofrio et al. The motivation to do so would have been to improve the integrity and structural rigidity of the cylinder block, see column 2 and line 7 of Onofrio et al.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show coolant pumps.
